21:17:32

Transform your operations with the most reliable flight information

KÜHNE+NAGEL

TNT THE PEOPLE NETWORK

UPS

DB SCHENKER

Lufthansa Technik
Logistik Services

BDP INTERNATIONAL

PANALPINA on 6 continents

DHL

The leading global provider of digital flight information

Understand and **interpret** cargo routings and route dynamics

Reference data
Vital files with IATA and ICAO information on airline codes, aircraft, aircraft types, locations and DST data.

WDF
(Worldwide Direct Flights) View, manipulate and analyse bulk flight schedule files with ease.

Historical flight status
Unique archive of historical flight status, dating back to 2004, with scheduled and actual departure and arrival times, delay and cancellation information all via a webservice or easily-consumable reports.

Schedules APIs
Simple and fast access to accurate flight information when you need it. Customise your own supply using this premier web service (SOAP in XML/JSON formats).

Alerts
Monitor flight schedule changes and receive a summary of changes as they happen through our flight schedule changes notification system.

Status APIs
Real-time flexible, easily-consumed APIs to integrate flight status information feeds seamlessly with your existing solutions.

SSIM
Integrate schedules seamlessly into existing operational systems with the industry standard file format.

Fleet tracking
Aircraft Situational Display (ASD) for commercial & private flight tracking to anticipate irregular operations and proactively solve logistics.

Alerts
Immediate notifications of flight status updates delivered to you or your users for distribution.

Access the **latest flight status** information on routes assigned for your shipments
