A network of possibilities for your airline data

OAG®
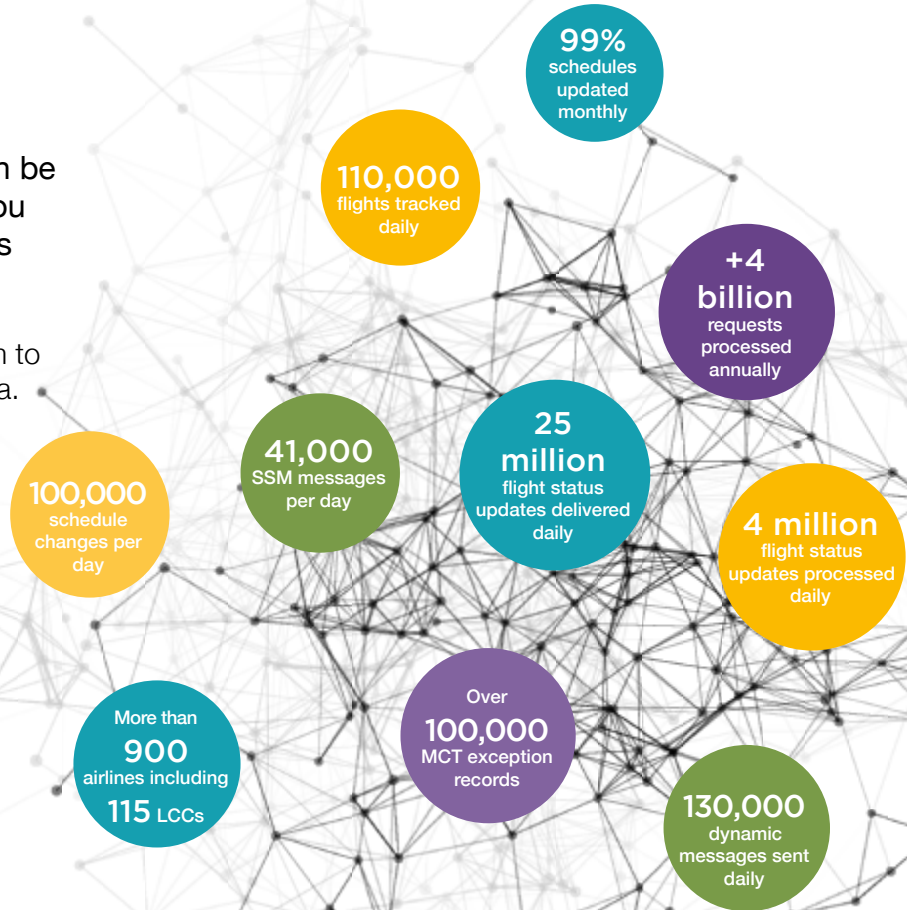

connecting the
world of travel

OAG and Airlines

With over 80 years' experience, you can be confident OAG knows how to ensure you get the most from your airline schedules and flight status data.

More than 900 airlines trust OAG's data team to manage their schedules and flight status data.

"We really appreciate the knowledge and experience the OAG teams bring to distributing the airlines schedules, be it on MCTs, ARCS or the daily SSIM file. The staff are well equipped to provide advice or deal with any problem that may arise and this is always accomplished in a friendly, courteous and reliable manner."

virgin atlantic

99% schedules updated monthly

110,000 flights tracked daily

Over 100,000 MCT exception records

130,000 dynamic messages sent daily

Our data expertise

With OAG, airlines feel a level of reassurance that their data is in the best hands - with those who understand data complexity, system feeds and how the industry works. Whether it is a large international carrier or a small regional start up, the team can advise on the most suitable synchronisation approach and distribution strategy for any airline.

OAG has been members of IATA's SISC (Schedules Information Standards Committee) for 30 years and has held the SSIM editorship for 10 years.

OAG remains at the heart of air travel developments, helping advise airlines and the wider industry on emerging developments and lead progress in data aggregation and synchronisation.

Meet the experts

Sarah Goodman
Operations Director

Sarah heads up OAG's expert data operations team who are responsible for the validation, aggregation, monitoring and delivery of OAG's schedules and flight status data to the world's leading GDS's and wider expanding network of providers across the air travel ecosystem.

Rothna Begum
Database Manager

Rothna is the current editor of IATA SSIM and is responsible for the quality and delivery of OAG's schedules and flight status databases.

Be everywhere you need to be
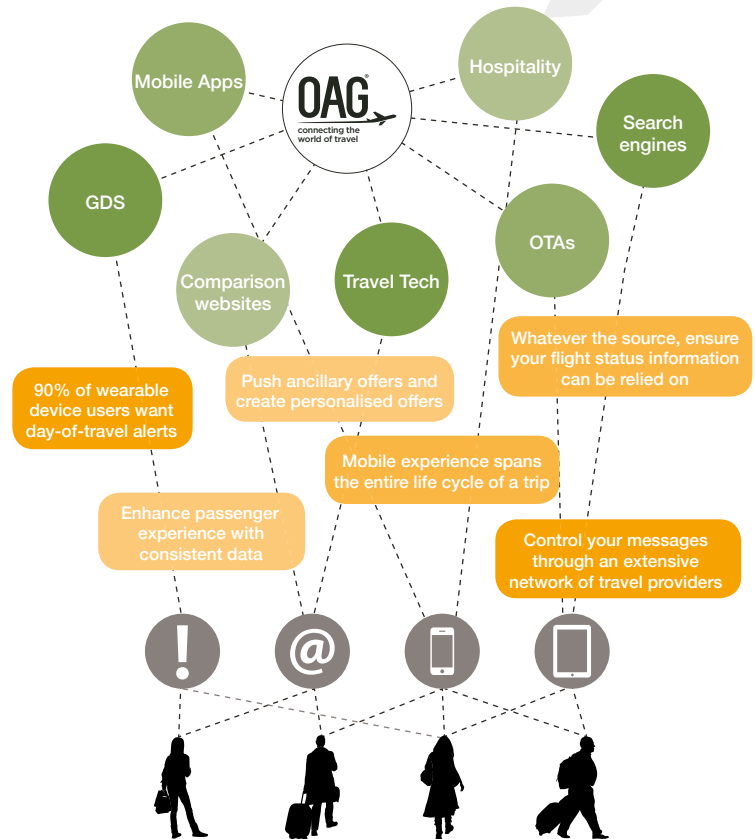

OAG schedules

Combining strong traditional partnerships with GDS's and a wider expanding network of travel related providers.

Ensure your maximum visibility and accessibility for your schedules data and gain far-reaching brand exposure with a customised distribution strategy to suit your needs.

OAG flightview

Evolving your flight status for a connected world with consistent and accurate information from one trusted source.

As the demand for flight status continues to grow, we ensure the wider travel ecosystem can rely on your flight status information throughout all stages of a journey.

Whatever the source, ensure your flight status information can be relied on

Mobile experience spans the entire life cycle of a trip

Enhance passenger experience with consistent data

Control your messages through an extensive network of travel providers

Choice and reassurance from the best in the industry

How to send us your data and updates

Schedules

We accept data in any format you prefer (SSIM, SSM, MS Excel, MS Word, PDF) and our systems can handle any level of update frequency you choose.

We recommend you choose SSM format – over 150 airlines supply direct messages into the OAG database making it the quickest and most effective way to get your data out to the market.

For further information contact databasecontent@oag.com

Flight Status

Send us your data in any format you prefer from MVTs (including MVAs, DIVs, GIAs and GIDs), SSMs/ASMs, to your own proprietary XML format or industry standard AIDX, or any other format you have the data available in. We are able to receive the data in real time through various delivery methods.

For further information on flight status data, contact ofsteam@oag.com

Why airlines use OAG

Network – a unique reach across the travel ecosystem

Innovation – smart solutions that unlock hidden value
