# SCHEDULES DIRECT

A new way to consume Schedules Data from OAG, that enables you to process and query data significantly quicker

MAKE SMARTER MOVES

Schedules Direct from OAG - a new way to consume schedules data

We have simplified the way customers can receive Schedules data from us. Partnering with Snowflake the global leader in cloud data platforms, we can expose the Schedules data directly to the customer via Snowflake which allows simple integration and configuration of the required data sets.

Who is Schedules Direct for?

Analysts, Data Scientists, strategic and investment customers regardless of industry vertical, who would traditionally use a WDF file to receive Schedules data to perform forecasts, analysis and look for trends. If you already have a Snowflake account, then connecting with us is a simple and seamless process and you can have immediate access to the Schedules data. If you don't have a Snowflake account – no problem, we can set you up with an OAG reader account for a small fee and you are ready to go.

What do our customers say about Schedules Direct?

"

Aviation Consultant:

Very Intuitive interface, similar to other SQL tools I've used. I really like the "History" section, nice to have an easy way to remember and reuse previous queries.

The queries I ran were in the 1M-row range, all were very quick, 2-3 seconds at most, and they were easy to export as a CSV.

Download of CSV files was very quick, 80 MB files were arriving in a second or two (I have 100MB/s connection at home where I'm working, so good to know that Snowflake servers are at least that fast).

I was able to get Tableau connected pretty easily. My end product for my client is Tableau-based, but I'm not yet sure if I would pull data directly with Tableau or grab CSV files.

For Tableau, I needed ODBC drivers supplied by Snowflake. Snowflake made them easy to get to and download - nice to not have to spend a lot of time Googling all over the place for them.

Overall, very good first experience - easy to use, and fast.

What data is included?

The complete traditional WDF set of data fields with:

↗ Global geographical coverage

↗ Airline / Airport specific availability

↗ Historical views – Daily, Weekly, Monthly, Quarterly etc.

Why Schedules Direct is for you:

↗ **Direct** real time Schedules data

↗ **Simplified** configuration and access to the data

↗ **Reduced** processing time and so reduced TCO – one customer saves ~8 hours of processing time per file

↗ **Powered by OAG** – The recognised and trusted leader in global aviation data.
