

OAG®

# MIDDLE EAST: MID YEAR CATCH UP

Wednesday July 24th, 2024

[www.oag.com](http://www.oag.com)

# SPEAKERS

## CHIEF ANALYST

**John Grant**

Chief Analyst, OAG

With a wealth of experience across the global aviation industry, John provides expert commentary on market developments for OAG, making connections between what the data is telling us and the trends and events occurring in the sector.

## GUEST SPEAKER

**Trent Mumford**

Vice President, Aviation

Trent Mumford has been consulting and working in the global airline and tourism industry for over 20-years with a focus on market access, growing new markets and strategic partnerships.

In 2022, Trent Joined Saudi Tourism Authority (STA) as Vice President - Aviation, to provide strategic advice in the development of Saudi Arabia's aviation capacity to deliver 'Vision 2030'.

## MODERATOR

**Deirdre Fulton**

Partner, MIDAS Aviation

Deirdre is a partner in an aviation consultancy providing meaningful insight and analysis to clients around the world. She works closely with OAG on their data analysis and publications.

# Today's discussion

- In this webinar we're catching up on all things aviation in the Middle East
  - In the week of Farnborough, just where is the Middle East aviation market heading?
  - Likely new aircraft orders being announced
  - Strategic partnerships evolving
  - New Route Announcements
  - Infrastructure developments and increases in capacity
  - Progress on Saudi Arabia's ambitious Vision 2030
- 
- We'll be taking questions as we go. Please use the chat function to ask your questions.

# GLOBAL GROWTH TRENDS

- Capacity growth has slowed a little and is now expected to be 3.5% above the pre pandemic period for Summer 2024.
- Domestic capacity is expected to grow at 3.1% this summer on last year and is trending at 4.3% ahead of 2019
- International is also ahead of 2019, by 2.6% and up 11.6% on 2023

# CAPACITY BY REGION – WHO IS LEADING RECOVERY?

## Domestic Capacity 2019-2024

## International Capacity 2019-2024

## Domestic Capacity 2019-2024

## International Capacity 2019-2024

# THE MIDDLE EAST MARKET

## Middle East - Top 5 Country Markets

➤ Growth rates across the UAE and Saudi are similar, at 9% and 7% respectively.

➤ Saudi Arabia has the largest domestic market in the region and is seeing strong growth of 12% year on year.

➤ Comparing Summer 24 v Summer 23 shows strong growth across 4 of the 5 largest Middle East country markets with Israel the exception due to the ongoing geopolitical situation.

## Middle East Domestic Markets

# MIDDLE EAST MAJOR MARKETS

- Over the past 25 years, the UAE has grown at an annual rate of 7.5%, whilst Saudi has been a little slower at 5.1%.
- In the last 10 years however Saudi Arabia has grown faster, at 4% on average each year, against the UAE's 1.6%. This of course reflects the strength of the Saudi domestic market which continued to operate during the pandemic.
- Saudi domestic capacity accounts for 45% of total capacity
- Both countries saw capacity recover to 2019 levels in 2023.

## Saudi Arabia & UAE Capacity over time

# THE VISION FOR THE REGION

- ACI project strongest growth in the medium term for the Middle East region
- Undoubtedly fueled by all of the work underway in various parts of the region with significant airport development projects underway
- Saudi Vision 2030 – 330 million passengers and 250 destinations.
- New King Salman International Airport in Riyadh is under construction and intended to handle 120mppa by 2030, and ultimately 185mppa by 2050
- UAE also has growth ambitions, with big expansion plans announced for DWC, which will have capacity to handle 150mppa by 2034
- New terminal at Abu Dhabi opened in late 2023 increasing capacity to 45mppa

Medium-term passenger traffic forecast by regions  
(indexed, 2019 = 100)

# STRONG GROWTH HAPPENING ACROSS THE REGION: SAUDI LEADS

## International Capacity Growth

## Middle East Fleet & Orders

- Strong growth taking place across the three major markets in the region when we compare growth this summer with the position five years ago in 2019
- Saudi Arabia has the highest capacity increase with 34% more seats this summer v's 2019
- Comparing spread across regions highlights the volume growth in Saudi international services between 2019 and now with proportionate growth to destinations in Africa, and Asia Pacific seeing the greatest increases

## Capacity by Region

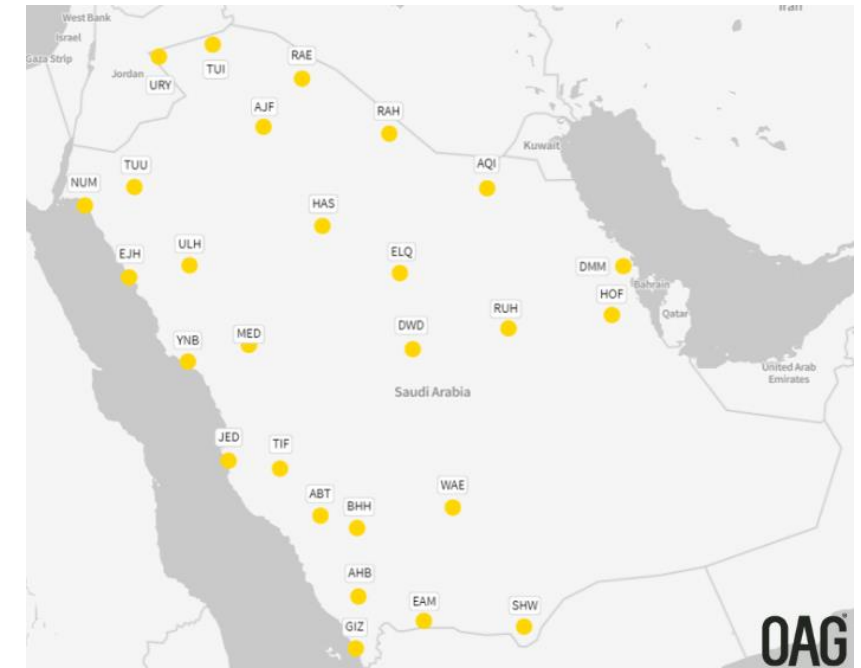

# DEEP DIVE INTO SAUDI ARABIA

## Saudi Arabia Airports by Size

- 27 airports in Saudi Arabia currently active, with over three quarters of the country's capacity operating through 3 airports – Jeddah, Riyadh and Dammam.
- Many of the remaining airports serve the large Saudi population of 36.4m which is the 17<sup>th</sup> largest domestic market in the world
- 18 of the 27 airports do have international flights and we can expect to see strong growth from some of the locations where the focus of tourism development is such as Neom and the Red Sea
- Saudia has the dominant share with 40% of seats this month

## Saudi Arabia Capacity by Carrier July 2024

# INVITING THE WORLD TO SAUDI ARABIA

International routes in S24	S19	S24
Country level	149	194
Jeddah	134	166
Riyadh	60	80

- Ambition is for 250 international destinations
- There are now routes to 194 international destinations from Saudi Arabia, an increase of 30% on Summer 2019.
- This summer sees 24 new unique routes starting operating from Jeddah and Riyadh to destinations such as Beijing, Shanghai, Berlin, Toronto and Jo'burg.

## Our mission 150 million visits by 2030

Come on a journey  
you've never imagined

 <b>CATHAY</b>	Hong Kong/Riyadh <i>From 28 October 2024</i>	x3/week

## OTHER INDUSTRY DEVELOPMENTS

- Another Olympic summer although demand is a little damp – Delta are citing a US\$100m revenue shortfall, tickets are lower than expected, especially for the qualifying stages and of course accommodation rates are high...
- Europe is in the throes of an ATC crisis as the peak summer holiday period commences – hundreds of flights are being grounded, Ryanair are frustrated
- Hurricane season is causing weather disruption already and there seems to be more to come – is there enough resilience in the systems?
- And finally, environmental costs – Lufthansa are imposing a charge, as are Virgin Atlantic, and there are more to come. Is this the next phase of increases in the cost of travel?
