OAG analytics

Mapper

## Bring your network and presentations to life

Visualise your network and connectivity	View 'what-if' changes to your network	Build and envision a new network	Visualise competitor network and activity

## Configure and customise results

The ideal boardroom quality map to bring your business plan, analytical projections and presentations to life.

Using Google maps, this intuitive and powerful mapping and marketing tool lets you:

- Access rich historical data and full future data in OAG's schedules database with over 900 airlines
- View existing routes and 'custom' routes in one map with new query options
- Plot unserved routes
- Use the new range functionality to highlight opportunities
- Match your corporate colours to stay on-brand with rich customisation options.

Key features

- Quickly plot airline or airport networks.
- Filter results according to alliance, airport, airline and aircraft type.
- Customise your network routes and end points with specific colour.
- Fully customisable to deliver a tailored visual for all business cases
- Save maps in your personal profile.
