

Manage your flight schedules supply with our premier API

Easy and immediate access to the most up-to-date, accurate flight schedules

Avoid maintaining your own schedules database and reduce operational costs

Power your website and other applications with a simple, fast API to maximise efficiencies

Give your customers access to flight schedules other aggregators don't have

Key features:

- Live web service with dynamic access to schedules data drawn from our database
- Complete control offering customers choice over data selection through a comprehensive, parameterised toolkit
- Tailor your specific query to get the results you need
- See date and time of travel 12 months ahead
- Dynamically generated single and double connections
- Include or exclude LCC connections
- Web Service (SOAP) in XML/JSON format

The flexibility and simplicity of the OAG Data solution gives us just what we need - up to date and reliable flight information, right into our own booking system.
